NH<sub>3</sub> is liberated if these ions are present, and it turns damp red litmus paper blue. Always use damp red litmus paper, by making the litmus paper wet. Nothing happens if the litmus is not damp! And make sure that the litmus paper never touches the test tube, because the test tube might contain an alkali which will turn the litmus paper blue.

O Level Chemistry 5070 Past Papers About O Level Chemistry Syllabus The Cambridge O Level Chemistry syllabus helps learners to understand the technological world in which they live, and take an informed interest in science and scientific developments. They learn about the basic principles of chemistry through a mix of theoretical and practical studies.

This book presents innovations in teaching and learning science, novel approaches to science curriculum, cultural and contextual factors in promoting science education and improving the standard and achievement of students in East Asian countries. The authors in this book discuss education reform and science curriculum changes and promotion of science and STEM education, parental roles and involvement in children's education, teacher preparation and professional development and research in science education in the context of international benchmarking tests to measure the knowledge of mathematics and science such as the Trends in Mathematics and Science Study (TIMSS) and achievement in science, mathematics and reading like Programme for International Student Assessment (PISA). Among the high achieving countries, the performance of the students in East Asian countries such as Singapore, Taiwan, Korea, Japan, Hong Kong and China (Shanghai) are notable. This book investigates the reasons why students from East Asian countries consistently claim the top

places in each and every cycle of those study. It brings together prominent science educators and researchers from East Asia to share their experience and findings, reflection and vision on emerging trends, pedagogical innovations and research-informed practices in science education in the region. It provides insights into effective educational strategies and development of science education to international readers.

Climate change is a controversial topic; some people assert that climate change is not occurring, and others believe that reports are inaccurate, that whilst climate change is happening, it may not be caused by human activity. There are also climate alarmists who use IPCC reports to support their claims that erratic weather patterns are a result of climate change caused by human activity. Regardless of these different viewpoints, one fact can be agreed upon; climate change is a complex subject and there is a need to educate future generations, enabling them to deal with the plethora of information and views that they will experience in their lives. This book explores what education for climate change entails, discussing the concept of Climate Change Education (CCE) itself, how it can be taught in schools and how public education can be carried out. It instructs what specific subject matter to teach for CCE, and how to evaluate the student learning on the subject. Chapters include: CCE in the Formal Curriculum Teacher readiness for CCE Assessment for and of CCE Lessons from CCE for Public Education Climate Change Education is an extremely useful resource for anyone involved in educating students on climate change and also for those interested in climate change itself.
