There's so much going on in baby development at 5-6 months. You might see new emotions, stranger anxiety, babbling, hand and body movements and much more. Babies can start eating solid food around now if they show signs that they're ready.

Baby development at 5-6 months | Raising Children Network

Introducing your baby to solid foods, also referred to as weaning or complementary feeding, starts when your baby is around 6 months old. Your baby should be introduced to a varied diet, alongside their usual breast milk or first infant formula. It can be confusing knowing when and how to start introducing solid foods.

Weaning | Start4Life

Breast milk or first infant formula provide the energy and nutrients your baby needs until they're around 6 months old (with the exception of vitamin D in some cases). If you're breastfeeding, feeding only breast milk up to around 6 months of age will help protect your baby against illness and infections.

Your baby's first solid foods - NHS

In younger newborns and up to 2-3 months old, your baby should breastfeed on-demand, which usually means every 2-3 hours. If you are pumping, breastmilk bottles vary in size from 3 to 6 ounces, usually, with 4 ounces being the average size once a baby is at least 3-4 months old.

Baby Feeding Chart - How Many Ounces By Age | The Baby ...

Usually your baby will gain weight most rapidly in the first 6 to 9 months. Their rate of growth will gradually slow down as they become a toddler and are more active. If your baby or toddler is ill, their weight gain may slow down for a while. It will usually return to normal within 2 to 3 weeks.

Your baby's weight and height - NHS

Sleep requirements at 3 to 6 months old. As your baby grows, they'll need fewer night feeds and will be able to sleep for longer. Some babies will sleep for 8 hours or longer at night, but not all. By 4 months, they may be spending around twice as long sleeping at night as they do during the day. Baby sleep at 6 to 12 months

Helping your baby to sleep - NHS

Babies and toddlers A normal temperature in babies and children is about 36.4C, but this can vary slightly. A high temperature or fever is usually considered to be a temperature of 38C or above. Your baby may have a high temperature if they:

how to take a baby's temperature - NHS - NHS
