Unlike most works in constitutional theory, which focus on the role of the courts, this book, first published in 2006, addresses the role of legislatures in a regime of constitutional democracy. Bringing together some of the world's leading constitutional scholars and political scientists, the book addresses legislatures in democratic theory, legislating and deliberating in the constitutional state, constitution-making by legislatures, legislative and popular constitutionalism, and the dialogic role of legislatures, both domestically with other institutions and internationally with other legislatures. The book offers theoretical perspectives as well as case studies of several types of legislation from the United States and Canada. It also addresses the role of legislatures both under the Westminster model and under a separation of powers system.

This groundbreaking volume introduces readers to the key concepts and debates in deaf studies, offering perspectives on the relevance and richness of deaf ways of being in the world. In *Open Your Eyes*, leading and emerging scholars, the majority of whom are deaf, consider physical and cultural boundaries of deaf places and probe the complex intersections of deaf identities with gender, sexuality, disability, family, and race. Together, they explore the role of sensory perception in constructing community, redefine literacy in light of signed languages, and delve into the profound medical, social, and political dimensions of the disability label often assigned to deafness. Moving beyond proving the existence of deaf culture, *Open Your Eyes* shows how the culture contributes vital insights on issues of identity, language, and power, and, ultimately, challenges our culture's obsession with normalcy.
