Fundamentals of Information Systems: Amazon.co.uk: Stair

An information system (IS) is a set of interrelated components that collect, manipulate, store, and disseminate data and information and provide a feedback mechanism to meet an objective.1It is the feedback mechanism that helps organizations achieve their goals, such as increasing profits or improving customer service.2Businesses can use information systems to increase revenues and reduce costs.

Fundamentals of Information Systems 6 E

A computer-based information system (CBIS) is a single set of hardware, software, databases, telecommunications, people, and procedures that are configured to collect, manipulate, store, and process data into information. This is similar to the monitoring of social media. Information Systems @ Work Aldra Manages Workflow to Support Customization
