This paper provides information relevant to the validity, reliability, comparability and interpretation of the Grade 9 Assessment of Mathematics, which was administered for the first time in Ontario schools in January and June 2001. It is intended to assist those who are interpreting and using the results. The paper includes information on development and content of the assessments; scoring guides and process; and analysis and reporting.

This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally, as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics, as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another, and this volume takes the stance that the development of a united vision, supported by both research and professional dialog, provides the first step.

Both practical and inspirational, the Classroom Assessment for School Mathematics, K-12 Series of handbooks and casebooks foster insights into what students know, what they can do and how they think mathematically. This guidebook considers new ways to assess students, focuses on assessment tasks, offers ways to plan and conduct a coherent classroom assessment programme and discusses the scoring, grading, reporting and use of assessment data. Complete with teacher-to-teacher and student-to-teacher letters, tips for teachers and responses to frequently asked questions, this book will provoke your thoughts and stimulate your conversations.
