For a more readable, engaging handbook, write simple, to-the-point summaries using a conversational and human tone. For some items, these summaries are sufficient. For many others, such as complicated legally-required policies, these summaries should serve as introductions to long-form, case-specific content. Case-specific.

Peopewatching is the culmination of a career of watching people - their behaviour and habits, their personalities and their quirks. Desmond Morris shows us how people, consciously and unconsciously, signal their attitudes, desires and innermost feelings with their bodies and actions, often more powerfully than with their words.

human traffickers and lured by false promises of good jobs or education, some are forced to work at gunpoint, while others are trapped by phony debts from unscrupulous moneylenders. The SAGE Handbook of Human Trafficking and Modern-Day Slavery provides a comprehensive, interdisciplinary and global look at the diverse issues surrounding human trafficking and slavery in the post-1945 environment. Covering everything from history, literature and politics to economics, international law and geography, this Handbook is essential reading for academics and researchers, as well as for policy-makers and non-governmental organisations

The Routledge Handbook of International Human Rights Law provides the definitive global survey of the discipline of international human rights law. Each chapter is written by a leading expert and provides a contemporary overview of a significant area within the field. As well as covering topics integral to the theory and practice of international human rights law the volume offers a broader perspective through examinations of the ways in which human rights law interacts with other legal regimes and other international institutions, and by addressing the current and future challenges facing human rights. This highly topical collection of specially commissioned papers is split into four sections: The nature and evolution of international human rights law discussing the

origins, theory and practice of the discipline. Interaction of human rights with other key regimes and bodies including the interaction of the discipline with international economic law, international humanitarian law, and development, as well as other legal regimes. Evolution and prospects of regional approaches to human rights discussing the systems of Europe, the Americas, Africa and South East Asia, and their relationship to the United Nations treaty bodies. Key contemporary challenges including non-State actors, religion and human rights, counter-terrorism, and enforcement and remedies. Providing up-to-date and authoritative articles covering key aspects of international human rights law, this book work is an essential work of reference for scholars, practitioners and students alike. Motivation is that which moves us to action. Human motivation is thus a complex issue, as people are moved to action by both their evolved natures and by myriad familial, social and cultural influences. The Oxford Handbook of Human Motivation collects the top

theorists and researchers of human motivation into a single volume, capturing the current state-of-the-art in this fast developing field. The book includes theoretical overviews from some of the best-known thinkers in this area, including chapters on Social Learning Theory, Control Theory, Self-determination theory, Terror Management theory, and the Promotion and Prevention perspective. Topical chapters appear on phenomena such as ego-depletion, flow, curiosity, implicit motives, and personal interests. A section specifically highlights goal research, including chapters on goal regulation, achievement goals, the dynamics of choice, unconscious goals and process versus outcome focus. Still other chapters focus on evolutionary and biological underpinnings of motivation, including chapters on cardiovascular dynamics, mood, and neuropsychology. Finally, chapters bring motivation down to earth in reviewing its impact within relationships, and in applied areas such as psychotherapy, work, education, sport, and physical activity. By providing reviews of the most advanced work by the very best scholars in this field, The Oxford Handbook of Human Motivation represents an invaluable resource for both researchers and practitioners, as well as any student of human nature.

This authoritative Research Handbook brings together leading international scholars and

practitioners to provide in-depth analysis of some of the most hotly debated topics and issues concerning the interface of human rights and business. Offering critical insights on prominent strands of research within the field of business and human rights, this comprehensive Research Handbook examines key challenges and potential solutions in the field.

The Routledge Handbook of Human Rights in Asia provides a rich study of human rights challenges facing some of the most vulnerable people in Asia. While formal accession to core international human rights instruments is commonplace across the region, the realisation of human rights for many remains elusive as development pressure, violent conflict, limited political will and discrimination maintain human rights volatility. This Handbook explores the underlying causes of human rights abuse in a range of contexts, considers lessons learnt from global, regional and domestic initiatives and provides recommendations and justifications for reform. Comprising 23 chapters, it examines the strengths and weaknesses of human rights institutions in Asia and covers issues such as:

Participation, marginalisation, detention and exclusion Private sector responsibility and security Conflict and post-conflict rehabilitation Trafficking, displacement and citizenship Ageing populations, identity and

sexuality. Drawing together a remarkable collection of leading and emerging scholars, advisers and practitioners, this Handbook is essential reading for students, scholars, policy makers and advocates of human rights in Asia and the world.
