These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS. These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.

Strengthen your ability to code accurately and obtain the correct reimbursement for medical services with this helpful workbook. Specifically designed to parallel the content of Carol J. Buck's Step-By-Step Medical Coding, 2013 Edition, it provides more than 1,500 questions and terminology exercises that cover both the ICD-9 and ICD-10 diagnosis coding systems, and includes over 90 original source documents to familiarize you with the materials you'll encounter in practice. Dual coding in chapters 13-31 (where both ICD-10 and ICD-9 answers are provided for every question requiring an ICD answer) ensures you can code using the sets of both today and tomorrow. Complete coverage of the new ICD-10 code set prepares you for the eventual transition from ICD-9 to ICD-10. Three types of activities help you master key concepts and apply your knowledge: Theory: fill-in-the-blank, multiple-choice, and true/false questions Practical: line coding exercises Reports: practice coding with actual medical record documentation Consistent question format with odd numbered answers provided mirrors the format of the main text to improve your coding skills and promote critical thinking. Over 90 original source documents, cleared of all confidential information, provide real-world experience with the reports you will encounter on the job. Updated content presents the latest coding information so you can practice with the most current information available.
