Computer System - Introduction Notes - BBA|mantra

Computer is an electronic device that receives input, stores or processes the input as per user instructions and provides output in desired format. Input-Process-Output Model

Access Free Introduction To

Computer input is called data and the output obtained after processing it, based on user's instructions is called information .

Basics of Computers - Introduction - Tutorialspoint

A computer is a hierarchy of parts (a system). There are many overlapping hierarchies

Access Free Introduction To

Computer Systems
and views, logical and physical views are both hierarchical and you can look at things from both a functional and architectural point of view. ICS only covers some of the views and hierarchies that exist.

Introduction to computer systems architecture and programming

A computer system
consists of hardware and
software. Hardware is
the slang word for the
physical
components?keyboards,
mice, circuit boards,

Access Free Introduction To

monitors and cables.

Hardware needs some maintenance, such as appropriate, safe cleaning, and must be protected from dust and heat. Dust buildup can even cause overheating.
