Many experts say that accounting is the connection between present and the past. The way we know accounting today was invented by Fra Luca Pacioli a Franciscan mathematician in late 15th century not far away from here, in Venice. Since then nothing much has changed in terms of how companies record the transactions.

This comprehensive, clearly written textbook teaches pharmacy students and pharmacists the basics of financial accounting, management accounting, and finance, and equips them with the financial skills needed in pharmacy practice. The Third Edition has been thoroughly updated with new content and realistic problems that allow students to apply what they have learned. This edition presents examples from diverse practice settings, including HMO, hospital, and long-term care pharmacies. A new chapter explains how decision analysis can be used to assist and inform decision-making. The significantly revised pricing chapter provides additional consideration to demand and the interaction of unit costs, volume, demand, and price.

Extremely practical and packed with current examples, Introduction to Health Care: Finance and Accounting delivers a comprehensive overview of the business side of healthcare. This entry-level healthcare finance book offers detailed discussions of cost reimbursement programs, economic factors driving the rising costs of medical services, and healthcare reform through the Patient Protection and Affordable Care Act of 2010. It explains the basics of healthcare accounting and finance, from accounting fundamentals, operating the cash drawer and bank reconciliation through the more complex issues of cash management, budgeting and variance analysis, and revenue cycle management. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Are you looking for an engaging, decision-focussed approach to financial reporting that encourages students to develop their interpretative skills? Building on the success of the first edition, this textbook takes a 'how, why, what' approach to financial accounting, interwoven in each chapter. From chapter one, students understand how financial information is prepared and presented, why it is prepared and presented in this way, and what the resulting financial information means for users. Designed for students taking a step beyond their introductory financial accounting training, the textbook equips them with all the key tools they will require when they enter professional practice. Reflective of the latest International Financial Reporting Standards (IFRS) and International Accounting Standards (IAS), this textbook delivers concise, clear explanations of all the key issues in accounting standards that students need to know. Content maps to professional accounting body syllabi, making this the perfect choice for accounting courses which offer exemptions. Chapters are rich with 3 types of examples to enhance understanding: - Illustrative examples of real-world situations; - Worked examples demonstrating the calculation of figures required for financial statements; - Extracts from company annual reports demonstrate how the theory relates to financial reporting in practice. More engaging, more balanced, and more applied than other offerings, this is exactly the textbook your financial reporting students need! An extensive Online Resource Centre accompanies the textbook and includes: For students: DT Solutions to all the end-of-chapter questions in the book including walkthroughs of solutions to key questions; DT Additional graded questions including professional body questions; DT Additional interpretative case studies based on real-life companies; DT A guided tour through a company report DT Specific study skills tips for accounting students For lecturers: DT Customisable PowerPoint slides DT Solutions to all the additional online questions DT Outline solutions to the interpretative case studies DT Group discussion questions
