A management information system is an advanced system to manage a company's or an institution's information system. it is a computerized database to organize and program in such a way so that it generates methodical reports for each level of a company. Reports for some special events can easily be obtained from the management information system. in simple words, the Management information system or MIS provides feedbacks to managers themselves about their performances.

12 Different Types Of Management Information Systems

An information management system (IMS) is a set of hardware and software that stores, organizes, and accesses data stored in a database. It also provides tools that allow for the creation of standardized and ad-hoc reports. There are numerous kinds of IMSs that can perform specialized business functions, including the following examples:
