Y.E. El Mogahzy, in Engineering Textiles, 2009. Abstract: Design conceptualization is the process of generating ideas for an optimum solution to the design problem. These ideas should stem originally from the product idea and stated definitions of the design problem. In most situations, product ideas are inspired by some need or want expressed by people, often in non-specific terms, as a ...

Conceptualization - an overview | ScienceDirect Topics

Conceptualization is a process that involves coming up with clear, concise definitions. Some concepts have multiple elements or dimensions. Just because definitions for abstract concepts exist does not mean that the concept is tangible or concrete.

Conceptualization

Step 1) Define the Problem - Identify problems through problem formulation and questioning. The key is asking the right questions to discover root causes. Step 2) Determine the Root Cause - During this process, assumptions are uncovered and underlying problems are further revealed. Also, this is an opportunity to collect and analyze data.

A system dynamics model is built to understand a system of forces that have created a "problem" and continue to sustain it. To have a meaningful model, there must be some underlying problem in a system that creates a need for additional knowledge and understanding of the system. The goal of the conceptualization stage is to arrive at a

Building a System Dynamics Model Part 1: Conceptualization

A conceptual model is 'a non-software specific description of the computer simulation model (that will be, is or has been developed), describing the objectives, inputs, outputs, content, assumptions and simplifications of the model' (Robinson, 2008). This definition establishes four facets of a conceptual model, as follows.

A conceptual model is a representation of a system, made of the composition of concepts which are used to help people know, understand, or simulate a subject the model represents. It is also a set of concepts. In contrast, physical models are physical objects; for example, a toy model which may be assembled, and may be made to work like the object it represents. Conceptual model may refer to models which are formed after a conceptualization or generalization process. Conceptual models are often
