Take a fresh look at Puntos - it's everything you wanted and more than you hoped for. Puntos has offered more than a million students a solid foundation to their language studies. The new edition of Puntos maintains its pioneer approach of the development of all four skills with a strong grammar and vocabulary foundation, as well as the teacher tested activities. The new design of Puntos brings to this program the best tradition of excellence and outstanding instructor support adaptable to different teaching and learning styles. Puntos , the most successful Intro Spanish program ever, is now: breaking new ground to meet the changing needs for face-to-face, hybrid, and online Spanish programs. offering students more opportunities to develop their communication skills via TelePuntos, a new integrated video program with corresponding in-text and digital activities. innovating through LearnSmart, a first-of-its-kind adaptive learning system within McGraw-Hill Connect, adjusts to the learning needs of every student This new edition of Puntos provides students with all of the necessary tools to take their second language acquisition from the classroom into their daily lives in an efficient and personalized way. With Connect Spanish, the exclusive digital learning platform from McGraw-Hill, students have access to Mundo interactivo, an immersive, story-based world where they experience the thrill of mastering relevant, task-based communication scenarios in real-world contexts. Also, with synchronous and asynchronous video chat functionality, students can easily engage in communication practice online. Additionally, McGraw-Hill and Blackboard® have teamed up to simplify the instructor and student digital learning experience! McGraw-Hill allows you to manage your course content, assignments, assessments, and grades all from within your institution's existing Blackboard environment. Puntos - it WILL take you there! *Connect Spanish, including but not limited to the workbook/lab manual, LearnSmart, the video program, and chat tools, is sold separately and does not come automatically with the purchase of the textbook.

It's more than a text. It's a program. Success in the language classroom requires so much more than just a text. In any language-learning setting, students require numerous and various opportunities to read, write, hear, and speak. Puntos de partida sets the standard for Spanish-language teaching. An innovative program that has been continuously refined for today's classroom, Puntos delivers proven pedagogy with clear and effective presentations, comprehensive teaching resources, and powerfully adaptive digital tools. Now in its anniversary Tenth Edition, Puntos builds on the holistic, five-skills approach it pioneered. It's the Puntos you know. It's the Puntos of today.

The information presented in this user friendly guide can be accessed either by therapeutic class or by system. As with previous editions each drug is independently reviewed. Tiziani from Monash University.

Review for in-course exams and the USMLE Step 1 with content that highlights the most important material in the current edition Robbins and Cotran Pathologic Basis of Disease. Easily find information with help from a format that closely follows the Table of Contents from the current edition of the parent text.

The WHO Classification of Head and Neck Tumours is the ninth volume in the 4th Edition of the WHO series on histological and genetic typing of human tumors. This authoritative, concise reference book provides an international standard for oncologists and pathologists and will serve as an indispensable guide for use in the design of studies evaluating response to therapy and clinical outcome. Diagnostic criteria, pathological features, and associated genetic alterations are described in a disease-oriented manner. Sections on all recognized neoplasms and their variants include new ICD-O codes, epidemiology, clinical features, macroscopy, pathology, genetics, and prognosis and predictive factors. The book, prepared by 135 authors from 35 countries, contains more than 600 color images and tables, and more than 2700 references. This book is in the series commonly referred to as the "Blue Book" series.

Introduction to Computing and Algorithms prepares students for the world of computing by giving them a solid foundation in the study of computer science - algorithms. By taking an algorithm-based approach to the subject, this book helps readers grasp overall concepts rather than getting them bogged down with specific syntax details of a programming language that can become obsolete. Students work with algorithms from the start and apply these ideas to real problems that computers can help solve. The benefit of this approach is that students will understand the power of computers as problem-solving tools, learn to think like programmers, and gain an appreciation of the computer science discipline.

Now in its seventeenth edition, Social Science: An Introduction to the Study of Society approaches its study from a common-sense perspective, rather than a formalistic perspective more common in social science. Readers will see how seemingly diverse disciplines intermingle and connect to one another - anthropology and economics, for example. The goal of the book is to teach students critical thinking and problem-solving skills that will allow them to approach social issues in an objective and informed way. New to this edition are significant updates on: The election of Donald Trump and the emergence of related populist movements Trade policy and health care Issues involving migration and immigration Emerging developments in artificial intelligence Comparisons between cultural and biological evolution Examples, data, recommended readings, and internet questions
