Global Warming Survival Guide

Global warming is a major threat to human existence. The solutions are likely to be complex and involve short-term strategies to adapt to the current temperatures, as well as long-term strategies to drastically reduce future emissions of greenhouse gases (12 - 14). Strategies for climate adaptation include better forest management, defenses against rising sea levels and flooding, improved infrastructure to withstand extreme weather events, and the development of comprehensive services to ...

When compared with other species that habituate places with lower temperatures, it was determined that the temperatures might be the reason why these species do not reproduce as much. This is why many believe that global warming might help the survival of these species drastically. It will especially work well on the species living in colder areas, referred to as the temperate species.
