Philanthropy for veterans, military servicemembers, and their families is a comparatively new and fast-growing branch of American charitable giving. Alas, there is little good information available to help donors act wisely. This book fills that gap. It was created as a how-to manual for philanthropists who want to make a difference with individuals who have served their nation, particularly during the period since the 9/11 attacks. Packed with profiles of the most

When we talk about our bucket list, we focus on the things we want to do before we die. What about the list of things we DON'T want to happen as we start to age? What do we call THAT list? I'll Be Right There is a guidebook for adult children caring for their aging parents—during what can be an emotionally charged and challenging time. The stories, information, worksheets, and resources in I'll Be Right There will clarify what you already know, and provide you with what you absolutely need to know, for each stage of your parents' aging. In every page I offer what I've learned as a daughter called into service by her family, to help you navigate the rough waters of parental caregiving. Everything from communication, to financial and legal strategies, to managing mental and physical health challenges is covered—just like we are having a conversation. I believe the hardest part of caregiving is knowing what to do and when for the people we love. Working through this book will give you the confidence, and peace of mind, knowing you CAN handle this!

At least 5.6 million to 8 million--nearly one in five--older adults in America have one or more mental health and substance use conditions, which present unique challenges for their care. With the number of adults age 65 and older projected to soar from 40.3 million in 2010 to

Get Free Va Caregiver Support Program Guidebook

72.1 million by 2030, the aging of America holds profound consequences for the nation. For decades, policymakers have been warned that the nation's health care workforce is ill-equipped to care for a rapidly growing and increasingly diverse population. In the specific disciplines of mental health and substance use, there have been similar warnings about serious workforce shortages, insufficient workforce diversity, and lack of basic competence and core knowledge in key areas. Following its 2008 report highlighting the urgency of expanding and strengthening the geriatric health care workforce, the IOM was asked by the Department of Health and Human Services to undertake a complementary study on the geriatric mental health and substance use workforce. The Mental Health and Substance Use Workforce for Older Adults: In Whose Hands? assesses the needs of this population and the workforce that serves it. The breadth and magnitude of inadequate workforce training and personnel shortages have grown to such proportions, says the committee, that no single approach, nor a few isolated changes in disparate federal agencies or programs, can adequately address the issue. Overcoming these challenges will require focused and coordinated action by all.

Strategies to prevent or minimize work-related musculoskeletal injuries associated with patient handling are often based on tradition and personal experience rather than scientific evidence. The most common patient handling approaches in the United States include manual patient lifting, classes in body mechanics, training in safe lifting techniques, and back belts.
