diverse organization of scientists, students, artists, preparators, advocates, writers and scholars across the globe, who are dedicated to the study, discovery, interpretation and preservation of vertebrate fossils.

SVP - Home - Society of Vertebrate Paleontology

Vertebrate paleontology is the subfield of paleontology that seeks to discover, through the study of fossilized remains, the behavior, reproduction and appearance of extinct animals with vertebrae or a notochord. It also tries to connect, by using the evolutionary timeline, the animals of the past and their modern-day relatives.

Vertebrate paleontology - Wikipedia

A few observations in there are out of date, but it's still a very comprehensive assortment of information on a large variety of vertebrate groups. A great starting point for anyone teaching Paleontology courses, especially if coupled with some more current sources.
