So how worried about mutations should we be? While there is evidence that they could be both a threat and an aid, it ' s important to recognise how little we know about the virus – our knowledge is shifting all the time. Early interpretations of data and sampling biases mean that conclusions from studies should be treated tentatively.

Coronavirus is mutating – should we be worried? | Varsity

We should be worried about real human stupidity, not imaginary artificial intelligence. The problem is not HAL but H.A.L. – humanity at large. Thus we should rather concentrate on the real challenges. By way of conclusion, I will list five of them, all equally important. We should make AI environment-friendly.

Should we be worried about AI? - BBC Science Focus Magazine

When Elon Musk speaks, people listen, and Musk's concerns about artificial intelligence have captured a significant amount of attention recently Musk's comments follow in a long line of well-known scientists and technical experts warning about potential disasters artificial intelligence could cause. Opinions on the subject range significantly, but knowing a bit about the history of artificial ...
