Chess is 99% tactics. If this celebrated observation is true for the master, how much more so for beginners and casual players! If you want to win more games, nothing works better than training combinations. There are two types of books on tactics, those that introduce the concepts followed by some examples, and workbooks that contain numerous exercises. Chess masters and trainers Franco Masetti and Roberto Messa have done both: they explain the basic tactical ideas AND provide an enormous amount of exercises for each different theme. Masetti and Messa have created a great first tactics book. It teaches you how to: - identify weak spots in the position of your opponent - recognize patterns of combinations - visualize tricks. 1001 Chess Exercises for Beginners can also be used as a course text book, because only the most didactically productive exercises have been used.

Written in lively, conversational style by two prolific and popular chess authors, it is aimed at players who have gone past the beginner stage and want to take their game to a whole new level. Its imaginative themes and instructional method are timeless, and the whole book is shot through with fun and humour.
